Use of ferro, zinc and magnesium salts  
and their mixed salts for the  
substitution of iron, zinc and magnesium

(54)

(57) Abstract:

&emsp; &emsp; &emsp; &emsp;

The use of iron(II), zinc and magnesium salts and their mixed salts, of alginic acid, of pectic acid, of a natural polymer, anionic carboxylic acid from the group comprising polymannuronic acid, polygalacturonic acid, polyglucuronic acid, polyguluronic acid and polyiduronic acid or their mixtures for the replacement of iron, zinc and magnesium is described.
